PROFESSIONAL SUMMARY

Holberton School graduate (Software Engineering Program, 2026) who builds REST APIs in Node.js with JavaScript/TypeScript and tools in Python, with PostgreSQL and MongoDB. Built an API covered by **147 automated tests**, and has merged pull requests in **freeCodeCamp** and **Cloudflare's developer documentation**. Builds with Claude Code and GitHub Copilot, and verifies what ships.

CORE COMPETENCIES

REST API Design | Node.js / Express | JavaScript / TypeScript | Python | PostgreSQL / MongoDB | Automated Testing | API Security | Open-Source Contributions

PROJECTS

Motamyezon -- Digital Books REST API

Built a production-style REST API for an Arabic digital book platform: **33 endpoints** across 5 resources, Joi request validation, and multi-format uploads (EPUB, AZW3, KFX).

Wrote a Mocha/Chai and Supertest suite of **147 tests** covering authentication, CRUD operations, permissions, and input validation.

Implemented JWT authentication with role-based access control (user, uploader, admin), hardened the API against NoSQL injection, XSS, and parameter pollution, and integrated S3-compatible storage (Cloudflare R2).

Node.js, Express, MongoDB

freeCodeCamp -- Screen-reader output fix

Open Source | Merged

Fixed an accessibility bug in the Python terminal where screen readers received only the last line of output; each printed line is now exposed as its own paragraph. Merged October 2026.

TypeScript, React

Cloudflare Docs -- R2 documentation typo fix

Open Source | Merged

Fixed a typo in the R2 public buckets guide, found while reading the R2 docs to move Motamyezon's file storage to Cloudflare R2. Merged September 2026.

Markdown to HTML Parser

Python CLI tool that converts core Markdown syntax into valid HTML from scratch, without any Markdown library, following PEP 8.

Python, CLI Tool

EDUCATION

Software Engineering Program Holberton School 2024-2026

CERTIFICATIONS

Back End Development and APIs | Relational Database | Quality Assurance freeCodeCamp

SKILLS

Languages: JavaScript/TypeScript (Node.js), Python, Bash **Databases:** PostgreSQL, MySQL, MongoDB (Mongoose)

Backend & APIs: Express.js, REST API Design, JWT Auth, Joi validation

Tools: Linux/Ubuntu, Git/GitHub, VS Code, Claude Code, GitHub Copilot, Mocha/Chai, Supertest, Swagger/OpenAPI

Spoken: Arabic (native), English (intermediate)
